DYNAMIC SHIP

for Microsoft Dynamics 365 Business Central

★★★★★ **4.9 on Microsoft Marketplace** · **Over 2,500 Installs**

EASILY ADD CARRIER INTEGRATION, REAL-TIME SHIPPING RATES, PACKAGE MANAGEMENT AND SHIPMENT TRACKING TO BUSINESS CENTRAL.

Multi-carrier shipping for Business Central that compares live rates, verifies every package by barcode, and keeps customers informed from label to delivery.

Dynamic Ship is Insight Works' shipping app, a Business Central extension covering rate shopping, package building, label printing, tracking, and customer notifications across parcel, LTL, and FTL carriers alike. Every rate comparison, label, and tracking update happens inside Business Central rather than a separate shipping tool, so the shipment a coordinator prepares never leaves the sales order it belongs to.

Why it holds up at the dock

Rate shopping, not guesswork. Compare live rates across parcel, LTL, and FTL carriers side by side at the sales order or warehouse shipment level, through one of 26 pluggable carrier connectors, so the best rate and service wins instead of the first one.

Packing verified before it ships. The barcode-driven Package Worksheet confirms every item scanned into a box against the order, catching a mis-pick before it becomes a return.

Freight charges stay under your control. Markups, discounts, and flat handling charges apply automatically by customer, carrier, shipping agent, ship-to address, or order value, with the choice to update the sales order to the actual cost or leave the quoted amount as is.

Customers see where their order is. Branded, real-time tracking pages and customizable shipment-confirmation emails keep the customer informed without a call to customer service.

International shipments carry their own paperwork. Customs and commercial invoice data populate automatically from Business Central master data and transmit electronically to the carrier, with US ACE/AES integration when required.

License plates are already built in. Dynamic Ship handles license plates as part of packing and shipping itself, not as a separate add-on purchase, so nothing extra is required to post a shipment.

Who's on it

Shipping coordinators
Easy carrier selection, rate comparisons, and streamlined shipping documentation.

Warehouse managers
Efficient space utilization, optimized package flow, and streamlined task management.

Order fulfillment specialists
Automation features that speed up order fulfillment and improve accuracy.

Customer service representatives
Immediate access to shipping information and tracking updates for customer communication.

E-commerce managers
Branded tracking pages and reliable shipping options that improve the online purchasing experience.

Free to install and evaluate. Dynamic Ship installs at no cost from Microsoft Marketplace, so you can try it in a sandbox before committing to production.

Backed by over 800 resellers. Insight Works works through a global network of more than 800 Business Central resellers who can help consult, implement, and support a deployment. **See the Insight Works reseller directory**.

DYNAMIC SHIP for Microsoft Dynamics 365 Business Central

RATE SHOPPING & CARRIERS

- Real-time rate shopping across parcel, LTL, and FTL carriers at the sales order or warehouse shipment level
- 26 pluggable carrier-integration connectors, covering hundreds of carriers; EasyPost is the default, most thoroughly documented connector
- Address validation and correction against an address database before a shipment is attempted
- Carrier accounts tie to specific shipping locations, so the right billing account applies automatically at shipment time

PACKING & LABELS

- Manual and automatic (“auto pack”) package building
- Barcode-scanner-driven Package Worksheet verifies each item as it is scanned into a box
- Batch and single shipping label printing, with cloud printing through the free PrintNode Connector PowerTool
- Return label generation, including the option to use a different carrier than the outbound shipment
- License plate handling is built in; it is not the separate License Plating add-on for Warehouse Insight, and not required to post a shipment

TRACKING & CUSTOMER COMMUNICATION

- Branded, real-time tracking pages for customers
- Customizable shipment-confirmation emails
- Immediate access to shipping status for customer service follow-up

INTERNATIONAL SHIPPING

- Customs and commercial invoice data populated automatically from Business Central master data
- Documentation transmitted electronically to the carrier
- Integration with the US ACE/AES system when required
- EDI support, including ASN/EDI 856 transactions, built on package-level detail captured during packing

FREIGHT CHARGES & AUTOMATION

- Configurable freight charge rules: markups, discounts, and flat handling charges by customer, carrier, shipping agent, ship-to address, or order value
- Choice to update the sales order to the actual shipping cost, or leave the originally quoted amount
- Multi-destination and distribution-list handling routes one sales order to multiple delivery points

BUSINESS CENTRAL LICENSING

- Free to install and evaluate from Microsoft Marketplace; most environments start in a sandbox for configuration before go-live
- Subscription, licensed per physical shipping location rather than per user
- Multiple Business Central locations at the same physical address need only one license between them
- Compatible with Device, Essential User, and Premium User Business Central license types
- Third-party carrier-integration providers may charge their own fees for rate shopping and label generation, billed to the customer separately from the Insight Works subscription

INTEGRATION & INSTALLATION

- Installs from Microsoft Marketplace like any other Business Central extension
- Assisted setup wizard, including carrier connector configuration
- A manual fallback lets shipments be prepared, labeled, and billed directly in Business Central without real-time carrier interaction, when configured ahead of time
- Insight Works or a certified partner typically handles implementation

PREREQUISITES & COMPATIBILITY

- Business Central online or on-premises
- All 26 carrier connectors are currently live and available
- Some capabilities are connector-specific: LTL, FTL, and international scenarios such as multi-leg truckload shipments or end-of-day carrier manifesting depend on the connector chosen and its own configuration

SUPPORT & RESOURCES

- Knowledge base at kb.dmsiworks.com: getting-started guides, configuration articles, and connector-specific setup instructions
- Supported directly by Insight Works, on the same contract as any other Insight Works app in use

DATA & PORTABILITY

- Rate comparisons, packages, labels, and tracking are handled inside Business Central, on the sales order or warehouse shipment
- Package-level detail captured during packing supports EDI and ASN/EDI 856 transactions downstream

ALSO FROM INSIGHT WORKS

Insight Works builds 30+ apps for Microsoft Dynamics 365 Business Central, concentrated in these areas of manufacturing and distribution. If Business Central has a gap, there’s a good chance we already have a solution.

Warehouse & Inventory Management
Barcode-driven receiving, put-away, picking, cycle counting, and license plate handling.

Shipping & Fulfillment
Carrier rate shopping, pick-to-ship execution, and shipment tracking.

Quality Control & Compliance
Inspections, test management, and quality documentation.

Production Planning & Scheduling
Capacity-aware scheduling, planning worksheets, and demand forecasting.

Shop Floor Execution & Maintenance
Shop floor data capture, machine maintenance, and production analysis.

Point of Sale & Data Tools
Counter sales, document attachment, label printing, and bulk data import/export.
